

# same product New Label

Our analytical inorganics and solvents are now residing under the Supelco® portfolio.

The product specifications, trademark and packaging will remain the same, the only difference is the label. Our portfolio will help you to find your perfect product for demanding analytical applications even more efficiently, because our high standards match yours.

The life science business of Merck operates as MilliporeSigma in the U.S. and Canada.

Distribuciones Industriales y Científicas S.L.

**Supelco®**  
Analytical Products

# Supelco® analytical products. Accurate. Precise. Consistent.

Our comprehensive portfolio, developed by analytical chemists for analytical chemists, covers a broad range of analytical solutions, and every product is meticulously quality-controlled to maintain the integrity of your testing protocols.

## Supelco® inorganics and solvents include:

- EMSURE®, EMPARTA® and EMPLURA® inorganics and solvents for classical analysis
- High purity solvents:
  - LiChrosolv® solvents for liquid chromatography
  - SupraSolv® solvents for gas chromatography
  - Uvasol® solvents for spectroscopy
- High purity Suprapur® and Ultrapur acids & bases
- High purity Suprapur® salts

## Accuracy.

We know only the most accurate analytical products will do. That's why we offer the Supelco® portfolio of analytical products. Whatever your needs are, our portfolio is always fit for purpose, ensuring your results are accurate.

## Precision.

Supelco® scientists are dedicated to your analytical applications. The expertise you need is always on hand to support you in achieving the reproducibility and precision you require.

Find all our products at  
[SigmaAldrich.com/Supelco](https://www.sigmaaldrich.com/Supelco)

## Consistency.

Every product from the Supelco® portfolio is meticulously quality-controlled to maintain the integrity of your testing protocols.

# Discover the benefits:

- Reproducible and reliable analytical results
- Comprehensive portfolio of analytical products and services
- Application-oriented products developed by analytical chemists for analytical chemists
